

STEM Regional Workshop – Turkey

JCIC Technology Consultancy participated in STEM Regional Workshop, which was organized by Erdim Koliji in Turkey on April 6th. More than 350 STEM & Robotics education professionals from over Turkey attended the workshop, and ideas about how governments and educational organizations can enhance their processes to advance the STEM and Robotics education in a way that is able to build the information generation.

JCIC presented the following main points:

- 1- The Japanese MoE approach towards teaching programming at public schools in Japan.
- 2- The milestones and approaches of teaching programming at Japanese public schools.
- 3- The STEM/Robotics Education challenges that education institutions face.
- 4- The key factor to succeed in teaching Robotics at schools.

In addition, JCIC participated in the show organized after the workshop. In its pavilion, a sample of JCIC robotics kits, teacher textbooks, and students textbooks were shown to participants, who expressed their interests to collaborate with JCIC, and implement the company systems at their schools and educational institutions.
